AIRSPACE CASE NUMBER:

18-AEA-169NR

TO ALL INTERESTED PARTIES

This is a study to decommission the SBY 122.3 Remote Communication Outlet (RCO) Frequency (frequency in MHz) located in Salisbury, Maryland. The Flight Service Station (FSS) program office conducted a frequency coverage analysis and safety panel which approved the removal of approximately 400 frequencies nationally and the retuning of approximately 139 frequencies. This proposal initiates a request to decommission the RCO within the Philadelphia District in accordance with the published FSS program office plan. Therefore, the SBY 122.3 RCO Frequency has been identified by the Eastern Service Area as a candidate for decommissioning.
