

SBY AIRPORT

SALISBURY • OCEAN CITY • WICOMICO

SBY Regional Airport is seeking an established Corporate Jet Center - FBO to support our airport.

SBY has FAA approval to build up to 38,000 sq. ft. hangar to support a new FBO with maintenance and avionics services, flight instructions, charter and business aircraft management, and an upscale but welcoming FBO.

New fuel farm will be an option to operate or pay fuel flowage fees. Will build to suit or lease with long term leases, under public private partnership. Maryland has attractive financing incentives. As an enterprise we have tax incentives for employers and employees. We have major improvement projects going on at SBY Regional Airport, to include a runway extension to 8,000'.

5485 Airport Terminal Rd, Salisbury, MD 21804
